★ VIRGINIA ★
DEPARTMENT *of* ELECTIONS

Users of the Voter Photo ID software will now have an easier and more accurate experience when capturing a voter's photo with the software. ELECT has provided a "framing silhouette" on the take picture side of the Take Picture tab to help users better frame the applicant for the best possible picture.

Users should line the head and shoulders of the applicant with the silhouette frame prior to clicking the Take Picture button. This will ensure that the picture is sized accurately for the ID card.
